

Skid House Standards

All skid house units:

- Azdel thermal barrier
- Dual pane windows
- All units without heat get a pass-through grommet
- All units include tow bar with pins
- Units with Upper Cabinet (Slammer and Shanty) will change to 15 amp service from 30 and use a 3 prong plug vs. twist plug on the outside of the unit.
- LP standoff bracket location - 20#
- We will put corner blocks in all window openings regardless of the window configuration.

Slammer:

All:

- electrical box opposite door
- 3 ceiling lights and half light underside of utility cabinet

Comfort Suite: 1 jackknife couch, 1 dinette table with seating, 8 holes standard

Heat options: Truma forced air includes cabinet and ducting 2 - 8" fans, 20,000 BTU

Martin - no cabinet

Weekender: 2 jackknife couches - 10 holes standard

Outfitter: Open design, 12 holes standard - optional for fewer and specific locations

Shanty:

All:

- Same window configuration and size as Slammer
- Same floors - can build shells
- Same electrical cabinet and functionality as Slammer (opposite of door)
- Flat roof
- 3 standard lights

8H-C: If Truma heat is installed, the same lower cabinet is used as Slammer.

Opposing foldover couches are optional.

8H-L: If Truma heat is installed a new design lower cabinet will be installed.

L configured rollover couches are optional.

12-P: 12 holes standard
